

## **PROJECT INFORMATION**

---

**Project title:** PROBS (PRObability Occurrence of Plant Species)

**Project ID:** 50

**Contact person:** Gertjan Reinds (gertjan.reinds@wur.nl)

## **PROJECT DESCRIPTION**

---

Development of a model that predicts probability occurrence of plant species from abiotic conditions. The model will be used for work under the Convention to assess effects of atmospheric deposition on natural habitat quality.

Abiotic measurements (soil and soil water) will be linked to observed plant species occurrence (here: ground vegetation) ICP Forests data will be combined with national datasets from countries under the Convention.
